Living Legend

Fu Manchu

Ride taken its toll
Non believers gather for
On a slow motion high road
Off course they goLord of the motor rise
Static shinning televised
Hundred years back again
Hundred more till the endLike I told you before
From the middle of the world
Like I told you before
From the middle of the worldLike I told you before
From the middle of the world
Like I told you before
From the middle of the worldWe heard the word and we're gone
Legend read, be warned
Quick arrival from above
Foot down not enoughTorn through the edge of some
Starting where it begun
Over burn rushing to
On foot, make it throughLike I told you before
From the middle of the world
Like I told you before
From the middle of the worldLike I told you before
From the middle of the world
Like I told you before
From the middle of the world
