

Love Bug

Joan Armatrading

It may rain tomorrow
But tonight is all that's on my mind
My baby's here in my arms
You know we've got it bad
'Cos tonight we've got the love virus We've both come down with the love bug
And it means we've got to stay in bed
I hope yous guys don't catch this
'Cos it knocks you right off your legs Love bug
Talking 'bout love bug
I said love bug
You know I mean love bug Let me explain the symptoms
First of all there's hardly any pain
With the love bug
You kind of lose your memory
You see, hear, think, talk, dream, care
Just for one person, only Don't come down with the love bug
'Cos it drives the sense
Right out of your head
This thing strikes in a curious way
It only hits when you're not looking Don't stand close to anybody
Who'll contaminate you
If you come down with the virus
Well, you'll never be alone again Don't come down with the virus We've both come down with the love bug
And it means we've got to stay in bed
I hope yous guys don't catch this
'Cos it knocks you right off your legs Love bug
Talking 'bout love bug
I said love bug
You know I mean love bug
I said love bug
Talking 'bout love bug Yeh, love bug
You know I mean love bug
Yeh, love bug
Talking 'bout love bug
Yeh, love bug
