## **Live In The Country**

## **Girls Aloud**

I do what I want and I'll do what I like

When I make a million I'll be out of sight

I'll do what I want and I'll do what I please

I'll laugh in your face when you beg on your kneesOoh, ooh yeah, there's got to be a better way Ooh, and I don't care, I know that when ILive in the country, if I live in the country

Live in the country, I'll find another way

Live in the country, to get rich live in the country

Live in the country, I know I'll be okayLive in the country, if I live in the country

Live in the country, I'll find another way

Live in the country, to get rich live in the country

Live in the country, I know I'll be okayEvery day is a drag, getting caught in the rat race You don't wanna be on the street

And every night when I crash you can see it in my face

I look like I'm dead on my feetSo I'm folding my cash, gonna live in the country

'Cause that's what I plan to do

'Cause the air's never bad when you live in the country

The sky is always blueOoh, ooh yeah, there's got to be a better way

Ooh, and I don't care, I know that when ILive in the country, if I live in the country

Live in the country, I'll find another way

Live in the country, to get rich live in the country

Live in the country, I know I'll be okayLive in the country, if I live in the country

Live in the country, I'll find another way

Live in the country, to get rich live in the country

Live in the country, I know I'll be okayLive in the country, live in the country

Live in the country, live in the country

Live in the country, live in the country

Live in the country, live in the countryI want the ducks and a lake and a family portrait

A pipe and a dog at my feet

I want a stall at the fete selling strawberry shortcake

And walls that are very discreteAnd when my dull city friends are slum it back in their bedsits

I'll live like a king every day

I'll be out of my head but they'll say I'm eccentric

And look the other way, I know that when ILive in the country, if I live in the country Live in the country, I'll find another way

Live in the country, to get rich live in the country

Dive in the country, to get from five in the country

Live in the country, I know I'll be okayLive in the country, if I live in the country

Live in the country, I'll find another way

Live in the country, to get rich live in the country

Live in the country, I know I'll be okay
