

Lift Me Up

Jericho Road

Every now and then I lose my way

I wander off the path

And I need someone to find me

oh, oh

When I think the pain is here to stay

And I might not make it back you remind me

I think it's one of those mysteries we're not meant to figure out

You'll be there when I need you most I have no doubt

Chorus

Even when my thoughts are far from you, even when I wander from the truth

you are always there beside me, Yeah

Everytime I try to walk alone, thinking I could make it on my own

And I fall when I begin, you're there to lift me up again

It always happens right out of the blue, when I'm in my darkest hour

And it's feeling like forever

No, no

Something always makes me think of you

And I can feel your power more than ever

I think it's one of those mysteries we're not meant to figure out

You'll be there when I need you most I have no doubt, No

Chorus

Even when my thoughts are far from you

Even when I wander from the truth

You are always there beside me oh oh oh

Everytime I try and walk alone, thinking I could make it on my own

And I fall when I begin, you're there to lift me up again

Even when I'm barely hanging on

I am weightless in your love and my fear is gone

Chorus

Even when my thoughts are far from you

Even when I wander from the truth

You are always there beside me, oh oh oh

Everytime I try and walk alone, thinking I could make it on my own

And I fall when I begin, you're there to lift me up again, yeah
