## 2Merica

I'm broken down here just for a second  
like a record clickin' end of the side  
fakin' neutral glares cannot hide you  
Di SpadeYears later and i'm out on my way  
the scent of far away glares don't lie  
women come, women go still no cry you  
viva ed impari, side by sideIt's the things that can't exist, can't exist  
stay still, stay still, stay  
If we go side by side  
It's just a moment in time  
It's a moment ...It's just the things that can't exist  
the things that can't exist  
It's the things that can't exist
