

# Firefly

Ed Sheeran

I fell in love next to you  
Burning fires in this room  
It just fits  
Light and smooth  
Like my feet in my shoes  
Little one, lay with me  
Sew your heart to my sleeve  
We'll stay quiet  
Underneath shooting star  
If it helps you sleep  
And hold me tight  
Don't let me breathe  
Feeling like  
You won't believe There's a firefly  
Loose tonight  
Better catch it  
Before it burns this place down  
And I'd lie  
If I don't feel so right  
But the world looks better  
Through your eyes There's a firefly  
Loose tonight  
Better catch it  
Before it burns this place down  
And I'd lie  
If I don't feel so right  
But the world looks better  
Through your eyes Teach my skin  
Those new tricks  
Warm me up  
With your lips  
Heart to heart  
Melt me down  
It's too cold  
In this town Close your eyes  
Lean on me  
Face to mouth  
Lips to cheek  
Feeling numb

In my feet  
You're the one  
To help me  
Get to sleep And hold me tight  
Don't let me breathe  
Feeling like  
You won't believe There's a firefly  
Loose tonight  
Better catch it  
Before it burns this place down  
And I'd lie  
If I don't feel so right  
But the world looks better  
Through your eyes There's a firefly  
Loose tonight  
Better catch it  
Before it burns this place down  
And I'd lie  
If I don't feel so right  
But the world looks better  
Through your eyes only been  
One night of love  
And maybe  
That is not enough Hold me tight  
Don't let me breathe  
Feeling like  
You won't believe  
only been  
One night of love  
And maybe  
That's not enough Hold me tight  
Don't let me breathe  
Feeling like  
You won't believe There's a firefly loose tonight  
Better catch it  
Before it burns this place down  
and I'd lie  
If I don't feel so right  
But the world looks better  
Through your eyes There's a firefly loose tonight  
Better catch it  
Before it burns this place down  
and I'd lie  
If I don't feel so right  
But the world looks better

Through your eyes
