

One More Time

No Authority

It was a year ago early one summer day
You wanted to see me before I left for a few days
I thought that you would give me that long kiss good night
But to my surprise you intended to say goodbye
Now I'm missing you and I
Been around the world
And I've seen your face one million times
I just can't believe you're out of my life
Tell me what am I to do, give me one more day with you
Baby, I just need you in my life one more time
Now I'm so far away but you are near in my mind
I want you to be right by my side just one more time
Stay with me girl, I look around and all I see is your sweet face
And I'm wondering if I can ever come back and take my place
You're all I need in my life
Oh girl, give our love one more try
Baby, can't you see just what you do to me
Please give me one more chance
I'll show you love and romance
Been around the world
And I've seen your face one million times
I just can't believe you're out of my life
Tell me what am I to do, give me one more day with you
Baby, I just need you in my life one more time
