Gotta Figure This Out

[Erin McCarley](#)

I separated my heart from my head
To feel out what's inside
I don't like what I see, so I say good nightDon't wake me 'cause I'm dreaming in color
Black and white is not my friend
Candy coated figures hold me in my bedI've never been so deep inside a shadow
I've never been so insecure of what I knowI've gotta figure it out, I need a story to tell
Where's the feeling I long for?
I've gotta figure it out before I lose you, loveBig city streets are calling me loud
The busy keeps me high
Well, this quiet town is wearing me down tonightI know that I should stay here for a while
Listen to the sound of my shaky heart
Looking for gold in the groundI've never been so deep inside a shadow
I've never been so insecure of what I knowI've gotta figure it out, I need a story to tell
Where's the feeling I long for?
I've gotta figure it out before I lose you
Before I lose you, loveIt's not okay to make you wait
To make you wonder why I
Can't hold you close or give you hope
That this will be all right, I wanna make it rightI've gotta figure this out, I need a story to tell
Where's the feeling I long for?
I've gotta figure it outI've gotta figure this out, I need a story to tell
Where's the feeling I long for?
I've gotta figure it out before I lose you
Before I lose you, before I lose you, love
