

# Box of Glory

## First Call

You hang your heart in the closet  
You hide your faith in your wallet  
When skies turn grey, say you knew it  
Won't ask for much, afraid you lose it

Running around in circles Mister Blue without your heavenly Father

There is gonna be another day  
The sun is coming up no matter what you say  
Why don't you take a different point of view  
There's a box of glory waiting here for me and you

There's a box of glory waiting here for me and you

I have no hope in my pocket  
My dreams will ram like a rocket  
I saw my life in the mirror  
That road don't get any clearer

Was running around in circles Mister Blue without my heavenly Father

There is gonna be another day  
The sun is coming up no matter what you say  
If you take a different point of view  
There's a box of glory waiting here for me and you

I need, you need, we need love  
God wants to give us so much  
I need, you need, we need love  
God wants to give us so much

Running around in circles Mister Blue without my heavenly Father

How will I get, will I get it without the truth  
Open up your mind  
Open up your eyes

There is gonna be another day  
The sun is coming up no matter what you say  
Come on and take a different point of view

There's a box of glory waiting here for me and you x2

I need, you need, we need love  
(There's a box of glory waiting here for me and you)  
God wants to give us so much  
(There's a box of glory waiting here for me and you)

There's a box of glory waiting here for me and you x2
