

Do Well (feat. Missy Modell)

Huey Mack

[Intro]

We recording?

And everything is going just great[Verse 1]

We young and we dumb and we full of ambition

We stubborn as hell and we never could listen

Cause nobody said what we wanted to hear

And now we on top and don't it feel weird?

It took a couple of years

But just like we planned we exceeded our peers

We ditching our fears and making our mark

So the who the hell are you to say we ain't smart?They never believe in you

They shit on everything you do

But they say they're proud of you

Like I don't even have clue

What they used to say

How they used to feel

And lil mamas gonna ride me like a wagon wheel

When they used to say I didn't appeal

Like change this is all so real

But it couldn't get better

When the boys from the sorry

Live ever, die never

If you hate it or whatever

I could really care less

Gotta a real tight circle

And I always feel blessed to have yall

I couldn't have done it without yall

When I'm up, we gonna all fall

Cause you were there through the rain fall[Hook: Missy Modell]

Ohh it's such a beautiful day

There ain't a damn thing that can get in my way

They say we dug our own grave

They used to laugh at you hey

But now they taking back the jokes they made

Cause we're finally doing well

Ohwoah, I feel like everything is going my way

Cause we're finally doing well

Ohwoah, cause I don't really care what they say[Verse 2]

Look at me now

Can't believe I made my momma so proud
I came from the bottom ain't nothing to show
And now show every show is sold out crowd
And life is so great
Made some mistakes on my last mixtape
Didn't think I would make it and get used to the fame
But now everything seems to fall into place
And it's crazy right?
Dreamt about this shit my whole fucking life
Spent too many nights thinking about getting paper
And having my name up in lights
But this is more than that
More than rapping, more than the fame
I'm proud of the fact that we started from nothing
And only a year look at how far that we came[Hook]
