Goodbye

Default

All work and no play makes another dull day
All work and no play makes another dull day
You're a car crash that's been going on for a year
You're a hurricane that hits when the sky should be clear
I, I got a gun and I'm into the weeds
You're everyone's fool and you're nobody's queen
When your first time your suicide king
You know we go together like cigarettes and gasoline
There's no reason to fight you know you may be right
You know you may be right
You tell yourself another good lie
You keep saying your song you know you may be wrong
You know you may be wrong
There's a lot to be said for goodbye
Give me one good reason why you think we're okay
I'll give you another ten thousand why I'm walking away
I'm tired of fighting and I'm sick of the pain
Tired of the chapter when you're acting insane
And here we are at the end of the day
We go together like kids and cocaine

There's no reason to fight you know you may be right
You know you may be right
You tell yourself another good lie
You keep saying your song you know you may be wrong
You know you may be wrong
There's a lot to be said for goodbye
All work and no play makes another dull day
All work and no play makes another dull day
All work and no play makes another dull day
All work and no play makes another dull day
It's time to say goodbye
There's no reason to fight you know you may be right
You know you may be right
You tell yourself another good lie
You keep saying your song you know you may be wrong
You know you may be wrong
There's a lot to be said for goodbye
Said for goodbye

There's a lot to be said goodbye
Said for goodbye
