Oh No Not Again

Ignite

We were fighting through the night
As this outside world is ending
We've been gone too long, it's been 4 years
Think of what those men did
Nothings changed, all the same
Just more suffering
The colors fading from brown
To a proli green
Dying through the night for ideologiesWe're still waiting for our justice
Our good sons, have all died in vain
As we drink to death
Choke on this bitter reign
I said oh no, not again
Just another army coming marching in
I said oh no, not again
If this is liberation then were all insane
We were fighting for our lives
As this all out war descended
We've been gone too long, it's been 4 years
Just a 19 year old kid
When the bombings come
As it lights up the night
Here comes another one
What got us into this fight?We're still waiting for our justice
Our good sons, have all died in vain
As we drink to death
Choke on this bitter reign
I said oh no, not again
Just another army coming marching in
I said oh no, not again
If this is liberation then were all insane
We were fighting for our lives
As this all out war descended
We've been gone too long, it's been 4 years
Just a 19 year old kid
We keep holding on, the end is near
Met the angels of death here
As the bombings come
Run for your lives!I said oh no, not again

Just another army coming marching in
I said oh no, not again
If this is liberation then were all insane
I said oh no, not again
Just another army coming marching in
I said oh no, not again
If this is liberation then were all insane
