

Worth It All

Jay Sean

No no no no
Oh
Lately, I don't know what we're fighting for
 What been so back and forth
 Lately, you shouldn't say I'm fine
 Cause I know that you're lying girl
Lately, I know we're supposed to be all rosy
 But roses come with their thorns,
And I really think you should know It ain't like the movies
 Why can't you see?
 Love is up and down
 And as long as we keep on moving
 We'll figure it out
 Yeah we gonna fight yeah we gonna fall
 Yeah we gonna go through it all
 And you might cry then we won't talk
 Then we ride back to the start
 When I'm lost in your kiss
 And the world don't exist
 But I know deep down in my heart
 We're worth it all
 We worth it all
 Worth it all You make me so mad
 That I can't stand you girl
 It's crazy the way you got me all figured out
 And when you turn it around
 You're amazing and I don't care we don't gotta be perfect
 You're perfectly worth it for sure
 And I just gotta let you know baby It ain't like the movies
 Why can't you see?
 Love is up and down
 And as long as we keep on moving
 We'll figure it out
 Yeah we gonna fight yeah we gonna fall
 Yeah we gonna go through it all
 And you might cry then we won't talk
 Then we ride back to the start
 When I'm lost in your kiss
 And the world don't exist

But I know(Yeah i know) deep down in my heart
We're worth it allPeople talk too much
I see them talk to you
The fears come straight from my heart
I might break sometimes
Get it wrong sometimes
As long as you give me the chance to make it rightYeah we gonna fight yeah we gonna fall
Yeah we gonna go through it all
And you might cry then we won't talk
Then we ride back to the start
When I'm lost in your kiss
And the world don't exist
But I know deep down in my heart
We're worth it allYeah we gonna fight yeah we gonna fall
Yeah we gonna go through it all
And you might cry then we won't talk
Then we ride back to the start
When I'm lost in your kiss
And the world don't exist
But I know deep down in my heart
We're worth it allSo girl I would do anything
Cause girl we're worth it all
