

We Shall Overcome

Nahko And Medicine For The People

I'm on the verge of everything
Been lookin to be surrenderin so honestly
Tip-toe to the edge of my destiny
Free fall backwards great mystery
Speakin to me, the pain of the youth
The confusion of the people and their struggle for truth
Yeah, regroup and renew
Time to regroup, renew the ambition of a nation
Zombies treadin on decaying foundation
Wasting, creating hostility among us
Turnin our back on our mother
We're turnin our back on our mother Look at what we've done
I remember...
I remember...
I forgive
I remember...
I remember...
I remember...
I forgive
These people are relentless, senseless, violent and racist
Providing installation in my day to day endness
Positivity can definately be contagious
Persuasive, 'cause I'm speaking my truth
I got my pennies in my pockets, but I'm pickin fresh fruits
Yeah, pickin fresh fruits
got my pennies in my pockets, but I'm pickin fresh fruits
Yeah, whoaoh
'Cause I live in a land of abundance
Where the rain off my roof is sacred and precious
And then we get the work to be found and ridin horses (?)
we all must split the courage of we locked to front (?)
Bringin it back to the land when there was food to hunt
And yeah, when there was food to hunt
And yeah, oh
I got one last thing on my mind
I remember...
I remember...
I forgive
I remember...

I remember...

I remember...

I forgive I'm learning the language of the planet

We inhabit and stab it with

The chemicals that we practice

And I've had it with habits, it's tragic

This trajectory course that we're on

Separated from the dirt, from ourselves, from the song

Every robot sings, with his hand to his heart:

"I will kill for god, and I will hit my mark

And I will stand, like a fool, for free cuz of the treason"

Nobody's bothering me, but other countries are weepin

Choppin the mountains in half

Can't you hear the earth screamin?

Whoaoh, can't you hear the Earth screamin?

Oh

Blood oil for dinner, better have an appetite

Yeah, Cuz we rape, pillage and plunder So you can heat your house tonight

I remember...

I remember...

I forgive

I remember...

I remember...

I remember...

I forgive All my empowered people, put your ones up!

Recognize our tribes are independant and restless

Searching for purpose beneath the rubble and wreckage

The message: Forgiveness starts with me!

Yeah! With me!

Stop blamin other people, take on the responsibility

Of generations to come

May they live in a world without governments and guns

Without governments and guns

Hey

Whoaoh

Your people who killed my people

My people kill your people

But our people are all one people

United by compassion for humanity's sake

We wake and meditate on the light of a new day

New chapter in the book of a thousand tounes

Yeah, a thousand tounes We shall overcome

I remember...

I remember...

I forgive Yeah, we shall overcome

(We shall overcome)
Yeah, we shall overcome
(We shall overcome)
I remember, I remember
(We shall overcome)
I remember, I remember
(We shall overcome)
Yeah, we shall overcome
(We shall overcome)
I remember, I remember
(We shall overcome)
Ooo yeah, I forgive
(We shall overcome)
I remember, I remember...
