

# Do You Remember Me

## Bessie Boni

Hello, do you remember me? I'm a song that you maybe  
already heard from anybody elseThey took some other melody But it's still what it used to be  
Those same old boring three chords and a stupid melodyThere comes a middle part this part will break my heart  
'cause I know that it used to be played so much better  
than the play it right now player so much better  
than they play it right nowHello, do you remember me? I'm a song that used to be  
already played by anybody elseThey changed some of the melody but it's still  
what it's always been  
The same old boring three chords and a stupid melodyThere comes the middle part this part's gonna break my  
heart  
'cause I know that it used to be played so much better  
thaan they play it right now played so much better  
than they play it right nowHello, do you remember me? I'm a song you definately heard  
already a hundred times beforeThey stole some other melody but it's still what it used to be  
Those same old boring three chords and a stupid melodyThere comes a middle part (again) this time it makes  
me fart  
'cause I know that another band would play it so much better  
than they play it right nowHello, do you remember me? I'm a song you definately heard  
already a hundred times beforeThey stole some other melody but it's still what it used to be  
Those same old boring three chords and a stupid melody  
d a stupid melody d a stupid melody
