

And All The Other Colors

10 Years

And then it's not down to wiles

Hours erode the days away

These years of infinity

Recycle and repeat this

Rebrith

Don?t shoot the messenger

You're the killer at your door

Magnify

The moment's we have lived

Pacify

The past lives we've laid to rest

And all the other colors

Are leaving this body and mind

Behind

Become another level

Leading into the divine

Divine

This crippled reality of tangible fantasies

Can't be, can't be, can't be

Our walls breathe, to a heartbeat

Are you a messenger, or the killer at my door?

And all the other colors

Are leaving this body and mind

Behind

Become another level

Leading into the divine

Divine

It's no good, no good, no

It's no good, no good, no good, no

Are you looking?

Yes, what should I see?

I've never seen such infinite beauty in my life?

I wish I could talk in Technicolor

I feel sorry for you, if you can't see it than you'll just never know.

And all the other colors

Are leaving this body and mind

Behind

Become another level

Leading into the divine
Divine
Become one with the energy
And all the other colors
Are leaving this body and mind
Behind
