Leprosy

BRS

Bodies deformed way beyond belief
Cast out from their concerned society
Flesh contorting day after day
Freak of the dark world is what the people sayTheir lives decay before their eyes there is no hope of cure
Among their own kind they live a life that's so obscure
First an arm and then a leg deterioration grows
Rotting while they breathe, death comes slowLeprosy will take control and bring you to your death
No chance of a normal life to live just like the rest
Leprosy will spread with time, your body soon to change
Appearance becomes hideous a sight too much to takeTuberculoid the most severe
Decay of the nerves comes fast
Sense of feeling soon to be gone
Life will never lastNo hope of recovery after the nerves are eaten away
Damage is done you feel no more pain
Bones decay deterioration grows
Origin of this horrid disease nobody knowsTheir lives decay before their eyes there is no hope of cure
Among their own kind they live a life that's so obscure
First an arm and then a leg deterioration grows
Rotting while they breathe, death comes slowLeprosy will take control and bring you to your death
No chance of a normal life to live just like the rest
Leprosy will spread with time, your body soon to change
Appearance becomes hideous a sight too much to take
