

Slip

One Eskimo

Slip off my skin-fall into bed, I'm stayin' in
With you-with you inside my head
Mail me a sample-phone me a kiss-I'm in a dream
Get me out of thisAnd of all the creatures under the sky
There is you and I, you and I
You and I, you and IIt's all too much, you're in every little thing I touch
It's all too real, you're in every little thing I feel
It's all such a waste, you're in everything I taste
Come on, come on Come on, come on
Be strongThink of a time-you name the place
I'll close my eyes...we're face
To face-I see your smile, I feel your kiss
I'm in a dream, get me out of thisThe only thing I've never tried
Is leaving here and suicideAnd of all the creatures under the sky
There is you and I, you and I
You and I, you and INever too much
Never too late
Never turn-away
Never say die
Never let it slip away
Never too much
Never too late
Never say die-never say neverNever never never never
Never too much
Never too late
Never turn-away
Never say die
Never never never never never
Never too much
Never too late
Never turn-away
Never say die
Never let it slip away
Never let it slip away
Never let it slip away
