Suspension (acoustic)

Lights

Somewhere we go to kill a while
A moment continuing for miles
Stars lay overhead your everywhere
Don't need anything as much
So shed on a thread stranded in air
When you get to far to touch
I'm a a ship sailing
And the seas are rough

I'm a satellite
In the space above
When I'm holding here
Or I'm hanging up
I'm in suspension
You're not close enough

You're not close enough
You're not close enough
You're not close enough
You're not (suspension)
You're not close enough
You're not close enough
You're not (suspension) close enough
You're not

Then comes the sun the
Solar flare
In the suspension
You can find me there
Lift my spirit high when you come here
Enemy and the heal
This sky feeling I get when you're near
Give it gravity to feel

I'm a ship sailing
And the seas are rough
I'm a satellite
In the space above
When I'm holding here
Or I'm hanging up

In the suspension
You're not close enough

You're not close enough
You're not close enough
You're not close enough
You're not (suspension)
You're not close enough
You're not close enough
You're not (suspension) close enough
You're not

(Suspension, suspension)

I'm ship sailing
And the seas are rough
I'm a satellite
In the space above
And I'm holding here
Or I'm hanging up
In the suspension
You're not close enough

You're not close enough
You're not close enough
You're not close enough
You're not (suspension)
You're not close enough
You're not close enough
You're not (suspension) close enough
You're not
