It's Not Over

L'Renee

Tonight you got me feeling naughty
Baby I'm a give you some
Put your hands all on my body
It's official you're the one
Let me undress you baby
You can get a little comfortable
Let me be your medicine (oh)
Gently
You fill me completely
I'm falling
Let me repay you
Hey, you are my obsession
With every breath I take
I just want to be near you
I'll never turn away from your love
You complete meIt's not over until
Till you get want you want
And I get what I want
Till we get what we want
It's not over until
Till you get want you want
And I get what I want
Till we get what we wantIt's not over until
Till you get want you want
And I get what I want
Till we get what we want
It's not overBaby can we take it to a place we've never been
Cast your fears aside
Open up and let me in
I love to receive
But I really wanna give
Baby let me explore your body
Baby put your hand in mine
As I slowly bring you near
Can you welcome me with open arms
Into this sacred gift
I don't wanna stop till you reach the full extent
Baby let me explore your body
With every breath I take

I just want to be near you
I'll never turn away from your love
You complete meIt's not over until
Till you get want you want
And I get what I want
Till we get what we want
It's not over until
Till you get want you want
And I get what I want
Till we get what we wantIt's not over until
Till you get want you want
And I get what I want
Till we get what we want
It's not over
