## U.S. Bombs

God bless the police invisible marines  
Your state isn't safe and niether is me  
We're the rats of experiment  
Suburban laboratore  
We're the mice without legs  
Tagged at birthLaboratory rats  
This is a labThe scientist he's your god  
The scientist till we're goneThe science fair's continual  
Aliens are having fun  
They let us go a bit in  
Our own time zone
