

My Place Is With You

Clay Crosse

I've walked along a hundred highways, some I wish I couldn't forget
And I've burned a lot of bridges but there's not one that I regret
'Cause every path I've taken an' they all have led me to
Knowing my place, my place is with You Had my promises forsaken into many empty words
I'm amazed and so astounded that I won't get what I deserve
Whatever lies I've lived for I have finally found the truth
I know my place, my place is with You You are my treasure forever, the one dream I've searched for I've not
been given my tomorrows, I'm only certain of today
If I don't see another sunrise, I will not have to be afraid
I know we will be together when all my days are through
I know my place, my place is with You
My place is with You, my place is with You, my place is with You
