

# Where I Belong

Cris Cab

Where did the time go?  
Sun still shining bright.  
Lost in vertigo, that's my kind of height. Lost my photograph.  
Of with your divine.  
Taking power back.  
Hope I get it right. (Chorus)  
But when I step inside, see your future where, I belong.  
And when I step inside, see your future where, I belong. Technological, unidentified.  
One true miracle, learning how to lie.  
Led by memories, born by satellite.  
Thirst for energy, wasted further nights. (Chorus)  
But when I step inside, see your future where, I belong.  
And when I step inside, see your future where, I belong. Where did the time go?  
Sun still shining bright.  
Lost in vertigo, that's my kind of height. Lost my photograph.  
Of with your divine.  
Taking power back.  
Hope I get it right. (Chorus)  
But when I step inside, see your future where, I belong.  
And when I step inside, see your future where, I belong.
