

Mercy

Mr. Little Jeans

Kindness
If it's the easy way then
Take it away from me Silent
You cause the wind caught on
Do save your apologies Corrode into collide
Collide and don't look back
I told you and I tried
Severed learn to fight back No longer quietly shady
No longer sneaking late at night
A silhouette of a lady
Tailor-made tales into the light Head down don't look around you
You've got too many enemies Home bound
Beginner's luck ran out
One reason you're on your knees Won't tell them what I know
Won't tell them what I saw
Got no more bricks to throw
Take or leave them make the call Corrode into collide
Collide and don't look back
I told you and I tried
Severed learn to fight back Round round and round
Broken back from the fall
Ring ring go the sound
Back against every wall Quiet before the storm
Cover as good as gone Corrode into collide
Collide and don't look back
I told you and I tried
Severed learn to fight back (Your hands are tied)
