The Ground Folds

Senses Fail

Just throw it back, for one more night

On a starlit and moon-struck night

The ground did fold and eat us both

But all my love, I did devoteBeneath the rafters the angels sing Spinning violence and playing with my heartThe song I wrote, it was for you

To live inside of me, I'm dying inside you

The song I wrote, it was for you.

To live inside of me, I'm dying inside youLost inside another crash

The bones I had, turned into ash

The world did cry, the night you died

And I am no good at suicideBeneath the rafters the angels sing Spinning violence and playing with my heartThe song I wrote, it was for you

To live inside of me, I'm dying inside you

The song I wrote, it was for you

To live inside of me, I'm dying inside youBut I lost what was mine

And I want what was mine

But I lost what was mine

And I want what was mineMy heart now it always breaks

The blood did drip and I did take

Another wish, another kiss

No more will for me to kill

We'd run away in our dismay

But please, come back to meJust throw it back, for one more night

On a starlit and moon-struck night

The ground did fold and eat us both

But all my love to youThe song I wrote, it was for you

To live inside of me, I'm dying inside you

The song I wrote, it was for you

To live inside of me, I'm dying inside you
