

Beautiful

Sevendust

200 miles per hour, that's how fast I seem to go
With the weight of the world on my shoulders
Slow down, come and catch us all
Wait, slow down, take, slow down
Why can't you help me? Slow down
Feel when I'm in doubt, I need something beautiful
To fill the space we've taken up
I need something to feel real again before I go numb
Downward spiral a kaleidoscope view
Is what you're seeing saying so jaded
The picture I drew
Come again, come again, come again
Wait, take, wait
Why can't you help me?
Wait take, wait, take
Feel when I'm in doubt, I need something beautiful
To fill the space we've taken up
I need something to feel real again before I go numb
Are you alive? Are you alive?
I'm alive, when I'm in doubt, I'm alive
