

Justine

Customs

You know what the people say
You and I, we get along
You know what the people say
You know where the people meet, satellites, the come and go
You know where the people meet
You know how the people sleep
Firelights, it's there, it glows
You know how the people sleep

Justine climb down your balcony
You know it's time to go
Justine come on and lie to me
You know where this will go

You know how the people talk
Don't look there is no sense
You know the people talk
Don't look back, just don't look back

Justine climb down your balcony
You know it's time to go
Justine come on and lie to me
You know where this will go
Justine you know...

Justine climb down your balcony
You know it's time to go
Justine come on and lie to me
You know where this, where this will go

Justine climb down your balcony
You know it's time to go
Justine come on and lie to me
You know where this, where this will go
