

Happy Stay

Buck-O-Nine

your days of sorrow will soon be gone
but don't worry now it won't be long
we'll make you happy we'll make you stay
you won't get out of here any other way
sign your name on the dotted line
because right here is where you start doing your time
the seclusion rooms where you'll stay
for the first seven days 'till we think you're ok
your actions will be charted
everything you do
your doctor will be here to talk to you in person
you've been diagnosed as a chronic depressant
no control of your mind
a disturbed adolescent
pity and sorrow seem to rule your world
life's vicious circle has taken it's swirl
