Get Down

Xscape

Verse One (LaTocha):
Baby, don't worry 'bout what they say,
Maybe, you and I can do our own thing,
All I want is for you and I to get down.
Baby I know just what your thinking,
I've got what you need but can you handle it,
All night long, all I want,
Is for you and I to go dance.
Chorus:
Baby we can do it,
Lets dance all night.
Come on make your move
Let's party all night
All night long,
All I want is for us to get down

Verse Two (Tiny):
Move on down to the dance floor,
The way you move you make me want you more,
All I want is for you and I to get down.
Just let the music take control of you,
Why don't we do what we came here to do,
All night long, all I want,
Is for us to get down, get down.
Repeat Chorus x2
We're gonna dance til the early morn',
We're gonna do what we came here for.
Move on down to the dance floor,
And get down, get down.
Repeat x2
