Race Defects

Brutality

All through life looking for answers
Finding nothing to make beliefs reality
So many religions - Who is right or wrong?
Probably no one - Soon man will be dead and gone
Wars across the globe - Taking lives of the innocent
Leaders not caring - Protected and safe
Too many problems for this race to solve
Ceasing to exist - Another form will evolveHumans - Animals of great intelligence
Build destructive tools - Structures already built
Crumbling! - Powered by their ignorance
Killing themselves off
Is there life in the future for the young?
Seems bleak - Time will tellExpendable citizens ask no questions - Blinded
Brainwashing society - Doing nothing about this dying world
Marked for disaster - Who will win?
World around us - Disturbing sight
You see no endSuch a waste bowing down - We never change
Mistakes meant to teach - Arguing over the truth
Can't accept the fact we all have our opinions
Reasons for life remain unexplained
