You

Us Baby Bear Bones

You___
Open my heart and fill it with dirt the filth from this forest is better than you you you you you you you

Open my heart
fill it with dirt
the filth from this forest is better than

Open my heart
fill it with dirt
the filth from this forest is better than

You fill every orifice
as if it is and I am this
so hollow hollow hollow my bones
and feed me the marrow, oh
tell me I'm hollow oh
tell me I'm Hollow
tell me I'm hollow
tell me to swallow oh

You you you are
the green around my neck
that I loose and I forget
but then I remember and I regret
that I I I you
we you us two
are the same kin from the memories womb

Open my womb
fill it with birth
cos I can make life
better than

Open my womb
fill it with birth
cos I can make life
better than
