## Stetson

Welcome  
this transmission  
from a fallen star  
otherwise known as ArcturusLight has departed  
from this black sun  
But please put us on  
to bring darkness down  
from your head and homeOur enterprise a success  
as return is no option  
our eyes were removed  
for our own safetyThe distance too great  
for you to hear our cries  
nevermind take this lamp  
we are beyond lightWe learned so little  
of inhuman culture  
before disappearance  
went right through usThe mothership  
boarded by fools  
we escape space  
in order to reach  
our destinationAnd if you are listening  
please tell us about the time  
where and when we exist  
no moreFor when you go  
we go with you  
via wormholes
