Privilege

The Fixx

So correct me if I'm wrong
Though a day's twenty four hours long
How come you feel unwired and disconnected
Draw attention to yourself
Is your life a living hell?
Change your act, re-write the script the way you planned itRadio news reports
Truth and fact distorts
And the world's majority is understated
If the views are on your mind
It's the wavelength you must find
Be prepared to hold your weightPrivilege you have the right
If you're on the frequency, yeah
If you're on the frequency, ooh yeah
So when you say that
There's always something else to do
There must be one thing you can try
There's always something else to doWhen a week has just three days
It's the young that always pay
But who keeps the cold at bay with understanding
If there's a dying urge inside
To release forgotten pride
Don't rely on words of gloom, don't be disjointedPrivilege you have the right
If you're on the frequency, yeah
If you're on the frequency, ooh yeah
So when you say that
There's always something else to do
There must be one thing we can try
There's always something else to doHeretic the witch was right
She had the frequency
She had the frequency
She has the potency
She has the potency
Energy the time is right
She had the frequency
To fight for decencyPrivilege you have the right
If you're on the frequency, yeah
If you're on the frequency, ooh yeah
So when you say that
There's never anything to do

There must be one thing you can try
There's always something else to doHow?
How I begin, tell me how, how?
I tune in, tell me how, how?
When do I tune in for now?Draw attention to yourself
Are you tuned into the show?
She had the frequency
She has the potencyShe had the frequency
She has the potency
[Incomprehensible]
