

Methadone

Rise Against

Love like a needle full of methadone
Prudent but not real, left you wanting more
Lipstick track marks bleeding red
Like Montagues and Capulets
For us child the stars refuse to shine
Oh well for us child do the stars refuse to shine?
Assume lets stroll along the land
We wound up back here again
Like unstable chemicals
Combining only to explode
What will it take for you to notice?
I am a heart on fire, the dawn walls diffuse
So don't get close
Trouble and the worth
Am I better off on my own?
Contaminated, quarantined then left alone
A shipment refused, address unknown
A damaged goods they soon forget
The choking dust that we got left
For us all, the stars refuse to shine
Time for vaining like a match
We burn like stars before the crash
But for you there's still a chance
Just let go
What will it take for you to notice?
I am a heart on fire, the dawn walls diffuse
So don't get close
Trouble and the worth
I'm better off on my own
On my own
Now there's nowhere to run
And yeah there's nowhere to hide
There's nothing under the sun
We haven't already tried
What will it take for you to notice?
I am a hand grenade, pin already pulled so don't let go
As we chase the sun my shadow slowly falls down
And without me along, you're better off and I know
You're better off and I know
And I know
