News Flash

Shampoo

News flash, news flash
Hear all about it
Hear all about it, hear all about itShut your mouth, you stupid cow
You've been talking way too loud
Cross your heart, you're gonna die
If you tell just one more lieYou know, we know what you're all about
You know, we know why'd you shout it out?
News flash, news flash
Hear all about it, hear all about it, hear all about itSecret, secret, you can't keep a secret
News flash, news flash
Hear all about it, hear all about it, hear all about itWe close our ears and close our eyes
Better say your last good-byes
Stick and stones and mobile phones
Whispered words and broken bonesYou know, we know what you're all about
You know, we know why'd you shout it out?
News flash, news flash
Hear all about it, hear all about it, hear all about itSecret, secret, you can't keep a secret
News flash, news flash
Hear all about it, hear all about it, hear all about itShut itHush, little girl, now don't you cry
We will give you two black eyes
One from her and one from me
You've caused all this miserySecret, secret, you can't keep a secret
News flash, news flash
Hear all about it, hear all about it, hear all about it
