

Me And Maxine

Sammy Kershaw

I used to kiss Maxine through the front door screen
 Standin' on her mama's steps
And if her daddy hadn't come along and run me off
I know I'd have never left It's a cryin' shame but that's they way it was
 Somethin' always there to separate us Well, I tried not to let it show
 But everyone seemed to know
There's something between me and Maxine She used to wave at me from across the street
 Through her bedroom window every night
 She was almost close enough for me to touch
But I still couldn't hold her tight That's how it's been right from the start
 Always somethin' there to keep us apart Well, I tried not to let it show
 But everyone seemed to know
 There's something between me and Maxine
There's something between me and Maxine All the things that came between us
 Couldn't change a thing
 Now we're together and that's how we're gonna stay
'Cause our love just grows a little more with everyday No, I'm never gonna let her go
 'Cause in my heart I know
 There's something between
 Oh, I just wanna hold her close
'Cause in my heart I know There's something between
 There's something between
 There's something between
Me and Maxine, me and Maxine I know, I know there's somethin'
 Somethin' between
 I know, I know there's somethin'
 Somethin' between me and Maxine
 Somethin' between me and Maxine
