

# Chance of a Lifetime

Mest

The end of the world's in front of me  
Hard to believe all I see  
It comes so close but pulls away  
To let me stay another day It's one chance in your lifetime  
But it won't be the last time  
It seems, there's always the next hill to climb  
And you know there's a lifetime The things that I see, never end  
Trickin' my mind to just pretend  
I understand what's happening  
When other's doubt, you still believe It's one chance in your lifetime  
But it won't be the last time  
I swear there's always the next hill to climb  
And you know there's a lifetime Changing what I once thought  
Letting go of what I once fought  
There's a life that you need to find  
All that surfaced has changed my mind The end of the world's in front of me  
Hard to believe all I've seen It's one chance in your lifetime  
But it won't be the last time  
I swear, there's always the next hill to climb  
And you know there's a lifetime
