## The Asteroids Galaxy Tour

With a heart made of stone I will apart your soul  
Turn around, take a step, say goodbye  
And you're slowly getting cold from the skin to the bone  
Turn around, take a step, say goodbye When you realize your time is up  
You'll get down on your knees, begging mercy  
With a heart made of stone I will apart your soul  
Turn around, take a step, say goodbye Turn around, take a step, say goodbye  
Turn around, take a step, say goodbye So long blue sky, ride in to the night, dream on lullaby Yo!  
She was born a believer, growing up an achiever  
One beat from her heart, will last forever and tear him apart  
Oh he's gonna cry up, we used to come  
Yeah he's gonna dry up, only one. Oh, lo, out of nowhere, she was standing there  
She was trying to make him see, reach out  
What she did to him she did to set him free  
But he was sedated, sedated in ecstasy. Reach out  
Reach out  
Reach out
