Dark City

Iced Earth

This place is dark and grey
Uneasy, I feel torn apart
My mind is clouded and blurred
This city is interchangingSacrifice memories past
Unaware of what I've become
Ooh, ooh, ooh, oohConstant changes are imploring me
Search my mind, look for the answers
Finding nothing but this fear in me
Immersing myself in this feelingRealizing I am not alone
They are watching people changing
Unconsciously twisting memory
Gathering our human feelingExperimenting
To understand the human soul
Endangered they'll fade away
They won't deceive me
They'll never take my soul away
Their life form fadesFill our heads with false identity
Synchronizing our confusion
Using the dead for their own need
Parasitic infestationImprisonment in celestial space
Unlocking the human life force
Escaping their grasp now we are free
Their objective failed unknowingExperimenting
To understand the human soul
Endangered they'll fade away
They won't deceive me
They'll never take my soul away
Their life form fadesExperimenting
To understand the human soul
Endangered they'll fade away
They won't deceive me
They'll never take my soul away
Their life form fades
