

# Show Me the Place

Leonard Cohen

Show me the place, where you want your slave to go  
Show me the place, I've forgotten I don't know  
Show me the place where my head is bending low  
Show me the place, where you want your slave to go Show me the place, help me roll away the stone  
Show me the place, I can't move this thing alone  
Show me the place where the word became a man  
Show me the place where the suffering began The troubles came I saved what I could save  
A shred of light, a particle a wave  
But there were chains so I hastened to behave  
There were chains so I loved you like a slave Show me the place, where you want your slave to go  
Show me the place, I've forgotten I don't know  
Show me the place, where my head is bending low  
Show me the place, where you want your slave to go The troubles came I saved what I could save  
A shred of light, a particle a wave  
But there were chains so I hastened to behave  
There were chains so I loved you like a slave Show me the place  
Show me the place  
Show me the place Show me the place, help me roll away the stone  
Show me the place, I can't move this thing alone  
Show me the place where the word became a man  
Show me the place where the suffering began
