

Time for You to Stand Up

Twin Atlantic

You say you want distance from me
Well, don't stand so close
Cos' there's nowhere else that you'd rather be
Surrender render
To the facts that don't relate
Cos' I've seen the light (seen the light)
And it guides me through change... change I did it all so you could be
Away away away (away from me)
I need you to
Believe believe believe (believe in me) You're like a car when there's ice cream on the road
Yeah, out of control
You suffocate me so that I had no hope
And then some then some
I only laugh when I think of your face
I've seen the light (seen the light)
And it guides me through change... change I did it all so you could be
Away away away (away from me)
I need you to
Believe believe believe (believe in me) I don't think I was talking to you
I don't think I was talking to you
I don't think, I don't think, I don't
I don't think I was talking to you
I don't think, I don't think, I don't think I did it all so you could be
Away away away (away from me)
I need you to
Believe believe believe (believe in me)
