

The Answer

Incubus

Step outside the bounds and take a
Big look at the times we live in
Who appointed you?
You're just an avid image on my screen
So take your bias point of view
Away from my organic institution
And now we dare to think ourselves
The answer's waiting content
(Look into your mind and guide)
The answer's clear as day, open your eyes
Now kill me
You killed the very thing that keeps us
Hanging on to our dear lives
So, in a sense you bit the hand that feeds us
Just to kill your prophet now
And with the coming generation
At the torn seams
This is what you call progress
I call it shame
The answer's waiting content
(Look into your mind and guide)
The answer's clear as day, open your eyes
Now kill me
What his law says
What his law says
What his law says
May not be the stepping stone for you
You killed the very thing that keeps us
Hanging on to our dear lives
You killed the very thing that keeps us
Hanging on to our dear lives
You killed the very thing that keeps us
Hanging on to our dear lives
You killed the very thing that keeps us
Hanging on to our dear lives, so
The answer's waiting content
(Look into your mind and guide)
Look into your mind and guide
Look into your mind and guide
