

My Friends

Stereophonics

Stop tap, drink back, eye on you
You're out to find that something new
Am I the fly you want trapped in your web?
I've seen that look a thousand times
Your innocence can make you blind
I can show you round a block or two Let me introduce you to my friends
(My friends, my friends, my friends, my friends)
Let me buy you things, let me in your head
(In your head, in your head, in your head, in your head)
My friend, my friend Kick back, think back, look at you
You got the look, you got the shoes
I'd like to fill your world and be with you
Your lust for life just turns me on
A star above that's shining on
Think I'd like to see the world like you Let me introduce you to my friends
Let me buy you things, let me in your head
Let us fly away, let this never end
My friend, my friend
