

Can I See You

Hootie & The Blowfish

I thought the ghost was starting to fade
It hadn't haunted me in days
Just when the sun was coming through
Coincidence out of the blue
I see you with a smile
You knock me to my knees
You don't mean to me
But you still got that hold on me
When I see you
It happens when I'm all alone
Sometimes, your presence is so strong
I try to sleep, turn out the lights
Say my prayers and close my eyes
And I see you with a smile
You knock me to my knees
You don't mean to
But you've still got that hold on me
When I see you
Anytime of day, anywhere I go
Any song on the radio
I hear your voice, I feel your touch
In the strangest places you show up
Can I see you
Can I see you, with a smile
You knock me to my knees
You don't mean to
But you've still got that hold on me, yeah, now
Can I see you
Can I see you
Can I see you
