Can I See You

Hootie & The Blowfish

I thought the ghost was starting to fade It hadn't haunted me in days Just when the sun was coming through Coincidence out of the blue I see you with a smile You knock me to my knees You don't mean to me But you still got that hold on me When I see you It happens when I'm all alone Sometimes, your presence is so strong I try to sleep, turn out the lights Say my prayers and close my eyes And I see you with a smile You knock me to my knees You don't mean to But you've still got that hold on me When I see you Anytime of day, anywhere I go Any song on the radio I hear your voice, I feel your touch In the strangest places you show up Can I see you Can I see you, with a smile You knock me to my knees You don't mean to But you've still got that hold on me, yeah, now Can I see you Can I see you Can I see you
