There's Us

Instant Star

There's me looking down at my shoes
The one smiling like the sun that's you
What were you thinking?
What was the song inside your head?There's us going on about a band
Working out how we'd play our hands
I lay there dreaming later, all alone in my bed
If I was stupid maybe careless so were youNot everything is supposed to come true
Some words are best unsaid
Some love is not really love at all
I'll keep everything I shared with you
And that's enough there's usFreeze frame, I'm not about to cry
It's to late for us to change, why try?
I've got a camera tucked away inside my heart
If I'm a loser or just unlucky, so are youNot everything is supposed to come true
Some words are best unsaid
Some love is not really love at all
I'll keep everything I shared with you
And that's enough there's usSomewhere between then and now
I looked away when you said we'll never change
And if you think what might have been
You'll lose today and we've got songs to playNot everything is supposed to come true
Some words are best unsaid
Some love is not really love at all
I'll keep everything I shared with you
And that's enough there's usNot everything is supposed to come true
Some words are best unsaid
Some love is not really love at all
I'll keep everything I shared with you
And that's enough there's usSome love is not really love at all
There's us
Some love is not really love at all
There's us
