When Paula Sparks

Copeland

Sleep now moon
I'll watch over her while the sun is up
And you'll have her eyes again soon
It's a glorious day
And my lonely heart is tired again
I am starved for her attention
That's when Paula sparks
That's when Paula sparks a little light in my eye
(Ever since she went away)
That's when Paula sparks a little light in my eye
(I miss her more everyday)
That's when Paula sparks
Sleep now sweet princess
I'll cheer for you silently
And carefully not to disturb
And I'll be ready on that evening
When you're starved for my attention
And you'll say, you'll say
Wait now prince there's a brilliant sky above
And a jealous moon in love and they are
Starved for our attention
(Ever since you went away)
That's when Paula sparks
(I miss her more everyday)
That's when Paula sparks a little light in my eye
(Ever since you went away)
That's when Paula sparks a little light in my eye
(I miss her more everyday)
That's when Paula sparks
Sleep now moon
That's when Paula sparks
(Ever since you went away)
That's when Paula sparks a little light in my eye
(Ever since you went away)
That's when Paula sparks a little light in my eye
(Ever since you went away)
That's when Paula sparks
