Give Up To Give In

A Heartwell Ending

Why I know everything changes tonight
Why though, does everything get me
Tonight I'll be waiting, tonight I'll be looking
I'm taking my chances
I'm running with everything that i get from you
That I got from youShe screams she screams my name at night
(She screams she screams my name at night)
She screams she screams my name at night
She's oh so sexualI'd rather rather give up then give in
I'd rather rather give up then leave it all behindI see it in your face
I see right through your disguises
Just know I'll never be the one to run and hide
One more little lie out of that mouth
I'll be the last one
To pretend to, to talk to, to befriend you in the end
I know that I'll be there
So tell me who's fooling who, tell me who fooling who in the end.She screams she screams my name at night
(She screams she screams my name at night)
She screams she screams my name at night
She's oh so sexualShe got her fist clamped tight and her feet on the ground
She got her lips sewn shut she's not making a soundI'd rather rather give up then give in
I'd rather rather give up then give inSpeed it up speed it up girl your moving so slow for me
So casually don't you see
Your never gonna catch me at that speed
Your moving in way to slow
I know everything changes tonight why though...She screams she screams my name at night
(She screams she screams my name at night)
She screams she screams my name at night
She's oh so sexualShe got her fist clamped tight and her feet on the ground
She got her lips sewn shut she's not making a soundI'd rather rather give up then give in
I'd rather rather give up then give inOne more minute to keep the record spinning i need this
We need this please don't let me go
One more minute to keep the record spinning i need this
We need this please don't let me goShe screams she screams my name at night
(She screams she screams my name at night)
She screams she screams my name at night
She's oh so sexualCome on give me your hips
Come on give me your lips
I wanna pull you in so tight

Compe
