

Get Away

Ms. Jade & Nesh

Yeah, yeah, yeah
Seize the moment, attempted fates
Step up the cold, dark into you
So many boys who wanna holla at me
Better make your move
Tick-tock, tick-tock, you're on the clock
Say it fess up, come on, now what
What makes you think that you're so special
Flaunting like I'm not on your game
Don't mean to seem disrespectful
But I don't wait
What makes you think that you're so different
Win me over make me believe you
Get away with a whole lot, don't ya?
Get away with me, get away, get away
Get away with me
Can't get mad at me for playing truth
But you just can't fight chemistry
Straight ahead boy eyes on me
'Cause I might look another way
Tick tock tick tock you're on my clock
Don't you, don't you, will you, won't you
What makes you think that you're so special
Flaunting like I'm not on your game
Don't mean to seem disrespectful
But I don't wait
What makes you think that you're so different
Win me over make me believe you
Get away with a whole lot don't ya
Get away with me, don't you baby
Anticipating what you're going through
Easy prediction
I'll be waiting patiently for you
No resistance no, oh so, hey get away with me
What makes you think that you're so special
Flaunting like I'm not on your game
Don't mean to seem disrespectful
But I don't wait
What makes you think that you're so different

Win me over make me believe you
Get away with a whole lot don't ya
Get away with me
What makes you think that you're so special
Flaunting like I'm not on your game
Don't mean to seem disrespectful
But I don't wait
What makes you think that you're so different
Win me over make me believe you
Get away with a whole lot don't ya
Get away with me
