

False Alarm

RollerBlue

I just want to press replay, but with another track this time
Go right back to yesterday, and play a different tune
Time was when you'd call my name
Was goin' well, right by the letter
Now it's turned out just the same
Doesn't this get any betterChorus
You wind me up, but it gets me down
You see your friends all over town
Is this the start of something real
Or is it just - another false alarmSometime soon I'll walk away, and leave you to your indecision
No longer in your sway, I'll find my own way there
Time was when we'd laugh out loud
Just like a new toy, finding new joys
Now your head is in the clouds
I'm making up my stories
That was then I'd feel good
Back somewhere I always could
Wasting time I'd never known
But right now look I have grownChorus
